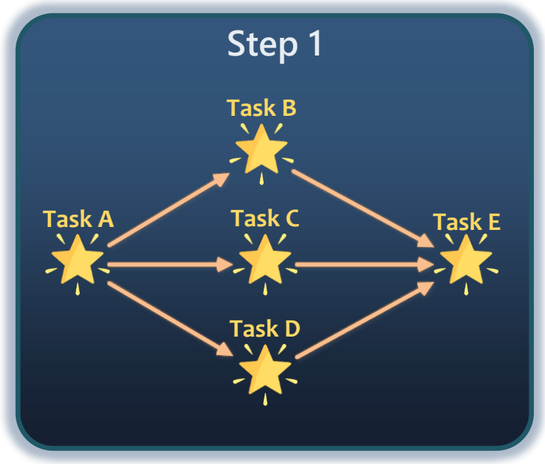
Complete all tasks on in schedule.xlsx on windows on linux servers, and write back the one-sentence result summary to the Result Summary column.



```
Task A (Windows): Read schedule.xlsx

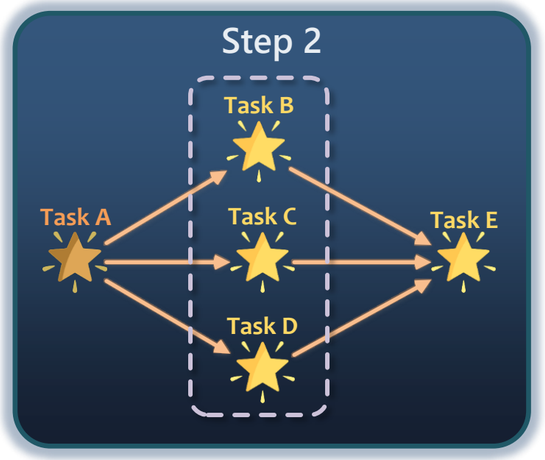
Task B (Linux1): Execute tasks on Linux1
Task C (Linux2): Execute tasks on Linux2
Task D (Linux3): Execute tasks on Linux3

Task E (Windows): Write results to Excel
```

WindowsAgent

Read

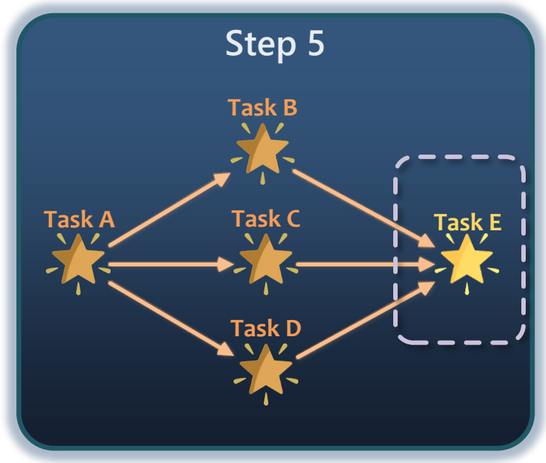
Task ID	Server	Task Type	Target Path/ Command	Threshold	Status
T001	Linux-1	Count Log size	/var/log/	3 days	Pending
T002	Linux-2	Disk Usage Check	df -h /home	85%	Pending
T003	Linux-3	Memory Check	free -m	80%	Pending
T004	Linux-1	File Count Check	/tmp	1000 files	Pending
T005	Linux-2	Process Check	ps -ef	grep python	??



```
update_task(task_id="Task B",
            description="""Execute the following tasks
            T001: Count Log size ...
            T004: File Count Check ...""", …)

update_task(task_id="Task C",
            description="""Execute the following tasks
            T002: Disk Usage Check ...
            T004: Process Check ...""", …)

update_task(task_id="Task B",
            description="""Execute the following tasks
            T003: Memory Check ...""", …)
```



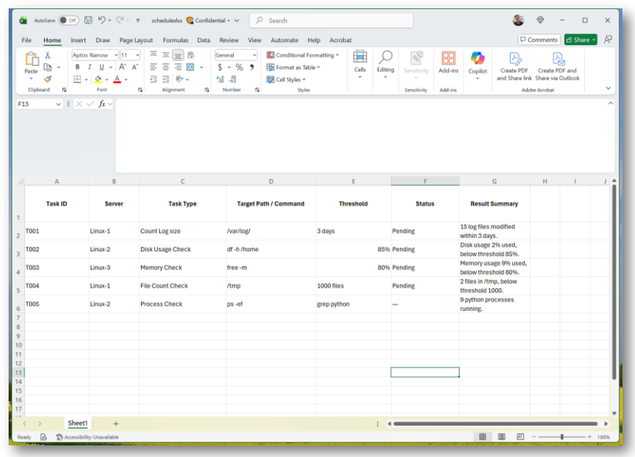
```
update_task(task_id="Task E",
            description="""Open 'schedule.xlsx' and
            Write the following into the 'Result
            Summary' column:
            T001: 15 log files modified ...
            T002: Disk usage 2% used, ...
            T003: Memory usage 9% used, ...
            T004: 2 files in /tmp, ...
            T005: 9 python processes running..."""", …)
```

WindowsAgent

Write

Task ID	...	Result Summary
T001	...	15 log files modified within 3 days.
T002	...	Disk usage 2% used, below threshold 85%.
T003	...	Memory usage 9% used, below threshold 80%.
T004	...	2 files in /tmp, below threshold 1000.
T005	...	9 python processes running.

Excel (Windows)



Final Result: All tasks from schedule.xlsx were executed on the Linux servers and their one-sentence summaries were successfully written back to the 'Result Summary' column. … The Excel file 'schedule.xlsx' has been updated and saved successfully, completing the user request.
