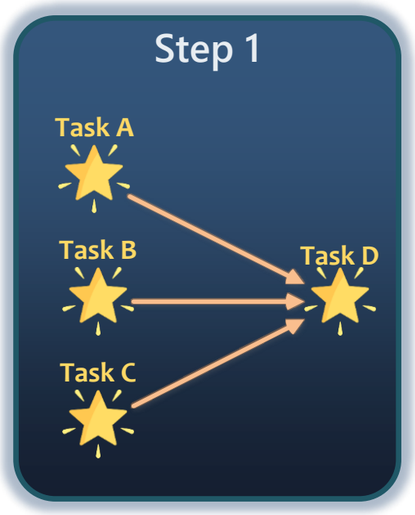
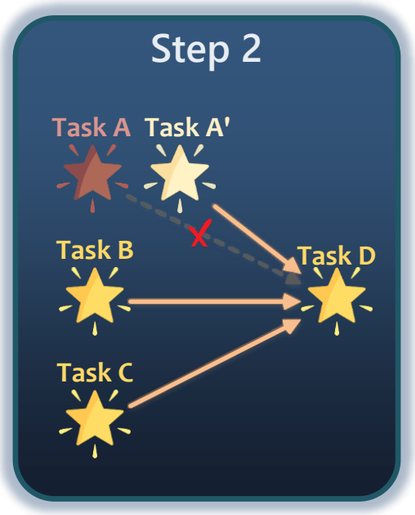
Scenario 1

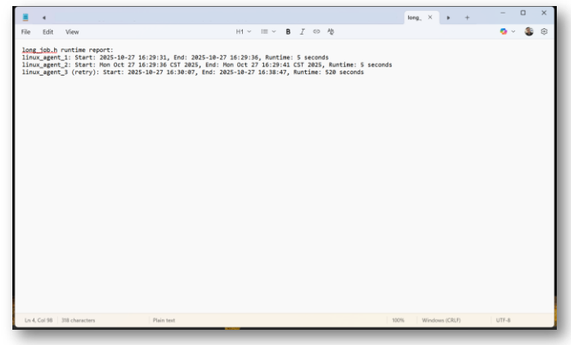


Linux1 Disconnected *(Task A Failed)*



Linux1 Resumed

Notepad (Windows)



```
Task A: Run long_job.sh on linux_agent_1
Task B: Run long_job.sh on linux_agent_2
Task C: Run long_job.sh on linux_agent_3
Task D: Create runtime report in Notepad
```

```
remove_dependency(from="Task A", to="Task D")

add_task(id="Task A'",
         name="Retry long_job.sh on linux1",
         device="linux1")

add_dependency(from="Task A'", to="Task D")
```

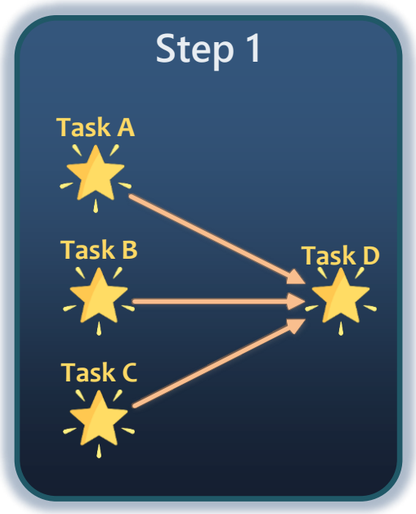
```
Task B: COMPLETED

Task C: COMPLETED

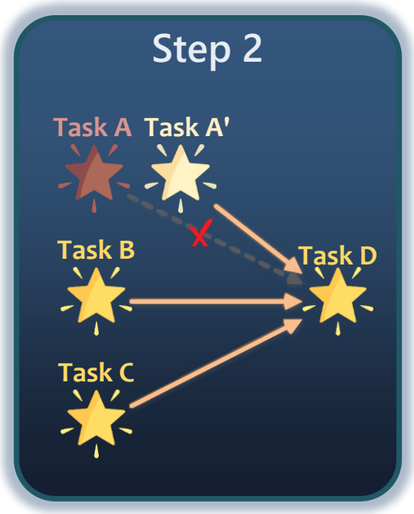
Task E: COMPLETED
```

```
Final Result: All three linux agents executed long_job.sh successfully. The Notepad report 'runtime_report.txt' was created and saved on the Windows agent's Desktop.  Overall request completed successfully.
```

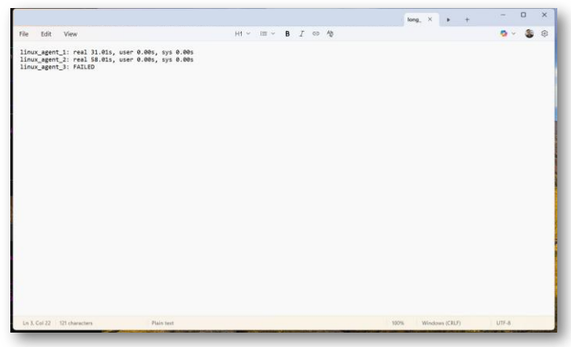
Scenario 2



Linux1 Disconnected *(Task A Failed)*



Notepad (Windows)



```
Task A: Run long_job.sh on linux_agent_1
Task B: Run long_job.sh on linux_agent_2
Task C: Run long_job.sh on linux_agent_3
Task D: Create runtime report in Notepad
```

```
remove_dependency(from="Task A", to="Task D")

add_task(id="Task A'",
         name="Retry long_job.sh on linux1",
         device="linux1")

add_dependency(from="Task A'", to="Task D")
```

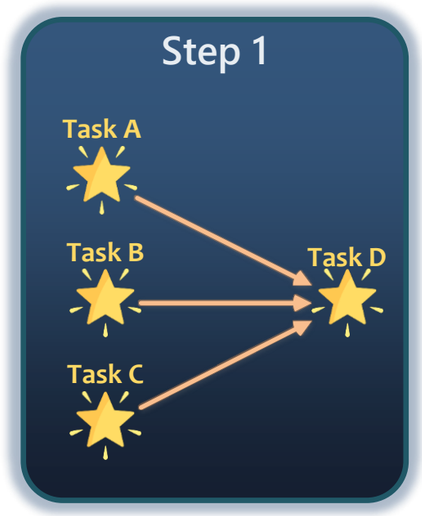
```
Task B: COMPLETED

Task C: COMPLETED

Task A': FAILED
```

```
Final Result: long_job.sh completed:
(linux_agent_1: 31.01s,
linux_agent_2: 58.01s,
linux_agent_3: FAILED). The Notepad report 'long_job_report.txt' was created.
```

Scenario 3



Linux1,2,3 Disconnected *(Task A,B,C Failed)*

```
Task A: Run long_job.sh on linux_agent_1
Task B: Run long_job.sh on linux_agent_2
Task C: Run long_job.sh on linux_agent_3
Task D: Create runtime report in Notepad
```

```
add_task(id="Task A'",...)
add_task(id="Task B'",...)
add_task(id="Task C'",...)

add_dependency(from="Task A'", to="Task D")
add_dependency(from="Task B'", to="Task D")
add_dependency(from="Task C'", to="Task D")
```

```
Task A': FAILED

Task B': FAILED

Task C': FAILED
```

```
Final Result: All long_job.sh executions on linux_agent_1-3 (including retries) have failed. The constellation cannot fulfill the request.
```
