
Device-side LLM agent ≈ 0.5B-10B
Device-Cloud Dilemma of LLM Agents
Cloud-based LLM agent ≈ 10B-1T
cost-efficient
low-latency
limited-capability
high-capability
cost-intensive
high-latency
step-level state
Embedding
Transformer Blocks
Binary classification head
routing
Hera Training Paradigm
(1) imitation learning
a = a ?
s
a
successful cloud trajectory
(2) reinforcement learning
identical state
temperature sampling
learning signal
