(a) Conventional LLM without reasoning capabilities
If I have $100 and I buy a $30 item, how much will I have left?
LLM
You start with $100.
If you buy an item for $30,
you subtract $30 from your total.
100 minus 30 equals 70.
So, you will have $70 left.
(b) LLM with static reasoning
Find the fastest flight deals from Paris to New York.
