Normal Agent
Task Scenario:
Find two saltshakers and put them in a cabinet.
Step 0:
Observation: Welcome to TextWorld, ALFRED! You are in the middle of a room ...
Memory: Kitchen context; two saltshakers
Reflection: Not started; no progress
Plan: Go to cabinet 1
Action: Go to cabinet 1
Reward: 0.0
...
Step 4:
Observation: Cabinet 2 is open; bowl 2 inside.
Memory: Cab1 empty; Cab2 closed → opened. No saltshakers found.
Reflection: Goal unmet; partial progress.
Plan: Close Cab2; check sequentially (3 → 4 → … → 10).
Action: Close cabinet 2
Reward: 0.0
...
Step 29:
Observation: Saltshaker 1 moved to countertop 2
Memory: Saltshaker 2 visible on countertop 2
Reflection: Goal incomplete; progress
Plan: Take saltshaker 1, then saltshaker 2
Action: Take saltshaker 2 from countertop 2
Reward: 0.0

Plan: Go to cabinet 1
Action: Go to cabinet 1
Reward: 0.0
...
Step 4:
Observation: Cabinet 2 is open; bowl 2 inside.
AgentDebug Detect
Error Type: Plan Module - Inefficient Plan
Advice: The agent fixated on cabinets, ignored likely surfaces; fix by expanding early to countertops/tables.
Memory: Cab1 empty; Cab2 closed → opened. No saltshakers found.
Reflection: Goal unmet; partial progress. Cabinet-only search inefficient; expand locations.
Plan: Go search countertop 1 for saltshakers.
Action: Move to countertop 1 to search.
Reward: 0.0
...
Step 24:
Observation: Cabinet 2 open; bowl2 and salt1.
Memory: Salt1 already in cabinet 2; holding salt2.
Reflection: Goal incomplete; place salt2 in cabinet.
Plan: Move salt2 to cabinet 2 now.
Action: Move saltshaker 2 to cabinet 2.
Reward: 10.0; task completed, success.
